How We Build Global High Yield Credit Strategy Portfolios

Representative Investment Universe¹

Core Asset Classes: Typically 80 – 100% of Representative Portfolio

Opportunistic Asset Classes: Typically < 20%

Developed Markets High Yield Bonds	Developed Markets Senior Secured Loans	Emerging Markets Corporate Debt	Structured Credit (CLOs)	Special Situations
---------------------------------------	---	------------------------------------	-----------------------------	-----------------------

1. Initial Underwriting

2. Buy List

3. Relative Value Assessment

4. Portfolio Construction

Fundamental Bottom-Up Credit Analysis

- Dedicated research analysts fully underwrite all potential investment ideas
- Deep relationships with sell-side banks, buy-side peers, corporate issuers and financial sponsors

Investment Committees

U.S. High Yield	European High Yield
Emerging Markets Corporates	Structured Credit

- Research analysts present recommendations at daily Investment Committee meetings for each region and asset class
- The Committees evaluate the analyst's recommendation and approve individual credits to the "buy list" to be eligible for investment

Global High Yield Allocation Committee

- Bi-weekly meeting of senior team members to discuss macroeconomic and technical conditions, seeking to identify where attractive relative value exists
- Sets target allocation across geographies and asset classes for global high yield credit strategy portfolios

Actively Managed & Diverse Portfolio

- Dedicated portfolio managers are responsible for implementing portfolio decisions in-line with the target allocations and approved "buy list"
- Portfolio managers actively manage the portfolio, collaborating with research analysts and traders on a daily basis

Time-Tested Approach To Investing In Global High Yield Credit

Strategy Overview & Competitive Advantages

- We believe that attractive long-term, risk-adjusted returns can best be achieved through:
 - Rigorous fundamental credit underwriting focused on principal preservation
 - Portfolios built from the bottom-up and are diverse across geographies, asset classes, industries and issuers
 - Active portfolio management aimed at identifying opportunities for capital appreciation, particularly during periods of volatility
 - Total return mentality with strict risk discipline through credit cycles

DEEP AND EXPERIENCED TEAM

We have one of the largest platforms dedicated to below investment grade credit, managing over \$6 billion in global high yield credit strategy portfolios and over \$85 billion across all strategies¹

GLOBALLY INTEGRATED TEAM

With deep resources across regions and asset classes, Barings is uniquely positioned to underwrite and evaluate the relative value opportunities across global high yield credit markets

FUNDAMENTAL BOTTOM-UP APPROACH

Large research teams allow us to fully underwrite nearly all credits and evaluate the full range of considerations (credit risk, documentation, ESG, etc.)

ACTIVELY MANAGED PORTFOLIOS

Collaborative team-based approach focused on diversified portfolios built from our “best ideas” with an emphasis on relative value, active risk management and total return

LONG TRACK RECORD

Team has managed global high yield credit through multiple credit cycles and was an early mover in launching global high yield credit strategy portfolios dating back to 2010

ROBUST INFRASTRUCTURE

Highly customized portfolio management, research and trading applications with seamless integration across our entire platform

Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global High Yield Credit Strategies composite has had a performance examination for the periods 2014-2019. The verification and performance examination reports are available upon request.

Definition of Firm

Barings, "Firm", provides investment management and advisory services to both institutional and individual clients. For purposes of compliance with the GIPS standards, the Firm defines itself as consisting of the portfolios that it manages directly. In 2017, the previous subsidiaries of Babson Capital Management, "Babson", including Babson, were consolidated under the Barings name for Firm definition purposes. Those entities included Babson Capital Management LLC, Cornerstone Real Estate Advisers LLC, Baring Asset Management Limited, and Wood Creek Capital Management LLC. In 2017, the firm assets represent the consolidated entity. Barings, "Firm", excludes Barings Shanghai and Baring Asset Management Korea Limited. Baring Asset Management Korea Limited independently claims compliance with the GIPS standards. Lists of composite descriptions, limited distribution pooled fund descriptions, and broad distribution pooled funds are available upon request.

Global High Yield Credit Strategies Composite Performance Notes

Policies

The Firm's policies for valuing investments, calculating performance and preparing GIPS reports are available upon request.

Composite Description

The investment objective of the total rate of return vehicles included in this composite is to achieve current income, and where appropriate, capital appreciation by investing primarily in a portfolio of high yield fixed and floating rate corporate debt instruments issued by North American and European companies. The Fund may also invest in structured credit products and securitized assets (including debt and equity tranches of collateralized loan obligations, mortgage backed securities, and other asset backed securities), corporate debt instruments issued by companies outside North America and Europe, stressed and distressed corporate debt instruments, corporate debt instruments from Emerging Markets (meaning non-OECD member states with a Sub-Investment Grade credit rating), payment-in-kind corporate debt instruments, convertible debt obligations, preferred stock, common equity and other equity instruments where associated with issuers of high yield debt instruments, and in units and/or shares in collective investment schemes. Valuations are computed and performance results are reported in U.S. Dollars. The minimum portfolio value requirement for inclusion in the composite is USD 10,000,000. The composite was created in July 2013. Inception date of the composite is 1st of July 2013. Principle risks include below investment grade, credit risk, market risk, liquidity risk, volatility risk, interest rate risk, structured products, distressed securities and illiquid securities.

Benchmark

The benchmark is an average annual return of 3 month Libor +500 basis points over a full market cycle, typically considered to be 3+years.

Fees

Returns are presented gross of management fees, custodial fees, and withholding taxes, except for non-reclaimable taxes, but net of all trading expenses. Net of fee performance results are calculated by deducting from the gross monthly return using the highest Institutional fee charged ("Model Fee") for a member portfolio on an annual basis dedicated to this strategy during the periods presented. The annual Model Fee is raised to the power of one-twelfth to compute the monthly fee. The composite monthly gross return is reduced by this monthly fee to arrive at a composite return netted of investment advisory fees. Actual fees may depend on, among other things, the applicable fee schedule and portfolio size. Applicable Fees 2013 forward: 70bps

Performance Results

Results are calculated using a time-weighted total-rate-of-return formula. The composite is asset-weighted; individual portfolios are valued daily on a trade-date basis and include accrued income. The composite and benchmark results assume the reinvestment of distributions. Performance results include all portfolios under the Firm's management that meet the Composite Definition. A portfolio is included in the composite when it is deemed that the investments made by the investment advisor fully reflect the intended investment strategy. Past performance is not a guarantee of future performance.

Assets, Composite Dispersion, Ex-Post Standard Deviation

The asset base used to calculate the composite's percentage of Firm assets includes both discretionary and non-discretionary portfolios managed by the Firm, and also includes non-fee paying portfolios. The asset-weighted dispersion calculation measures the deviation of individual portfolio returns around the aggregate composite return. Only portfolios that have been managed for a full annual period have been included in the dispersion calculation. No Dispersion is reported for periods with five or fewer portfolios (shown as NM). The three-year annualized ex-post standard deviation of the composite gross return and benchmark are displayed above unless 36 monthly returns are not available (shown as N/A).
